

Sonic Emotion **Absolute Voice™** provides a unique solution for improved voice clarity of single compact devices, laptops and TVs. Sonic Emotion's **Absolute Voice™** works by analyzing the incoming sound and controlling the voice independent from ambient sound and effects. The resulting sound is easier to understand especially by elderly and hearing-impaired people and results in higher end-user satisfaction.

## Hear it loud and clear

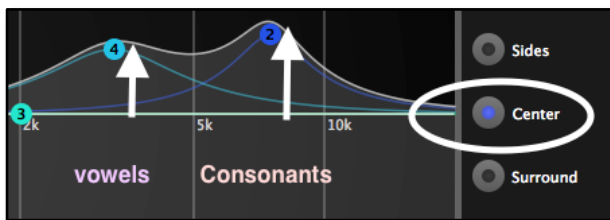

## Sonic Emotion **Absolute Voice™**

- Separates centered voice from music, effects, and ambience
- Selective control of voice sound, increasing presence
- Spatial separation of voices allowing for better segregation from music, effects and ambience
- Better intelligibility of speech without compromising sound balance for music and movies

Sonic Emotion has built its unique voice clarity solution around the most advanced spatial sound analysis available in **Absolute3D™**.

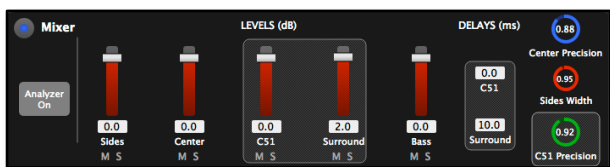

## System Requirements

- Available in **Absolute3D™**
- Does not require any extra hardware
- Creates virtual center channel for audio system without center speaker

Sonic Emotion **Absolute Voice™** technology simplifies the tuning process as voice signals can be tuned separately from the music signals even when the incoming sound format is stereo. Detailed control of equalizers and compressors for voice improves speech intelligibility without jeopardizing the balanced sound of music or ambience.

## Easy to use

- Best choice solution for TV, sound bars, laptops
- Easy to use tuning tools available
- Specific Equalizer & Compressor for voice
- Direct level control of voice versus effect & music
- Ability to create different sound modes for music, movie, and news ...
